This testimony discusses our first annual report to Congress responding to the statutory requirement that GAO identify federal programs, agencies, offices, and initiatives--either within departments or governmentwide--that have duplicative goals or activities. This work can help inform government policymakers as they address the rapidly building fiscal pressures facing our national government. Our simulations of the federal government's fiscal outlook show continually increasing levels of debt that are unsustainable over time, absent changes in the federal government's current fiscal policies. Since the end of the recent recession, the gross domestic product has grown slowly, and unemployment has remained at a high level. While the economy is still recovering and in need of careful attention, widespread agreement exists on the need to look not only at the near term but also at steps that begin to change the long-term fiscal path as soon as possible without slowing the recovery. With the passage of time, the window to address the fiscal challenge narrows and the magnitude of the required changes grows. This testimony today is based on our March 2011 report, which provided an overview of federal programs or functional areas where unnecessary duplication, overlap, or fragmentation exists and where there are other opportunities for potential cost savings or enhanced revenues. In that report, we identified 81 areas for consideration--34 areas of potential duplication, overlap, or fragmentation and 47 additional areas describing other opportunities for agencies or Congress to consider taking action that could either reduce the cost of government operations or enhance revenue collections for the Treasury. The 81 areas we identified span a range of federal government missions such as agriculture, defense, economic development, energy, general government, health, homeland security, international affairs,...
