paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 235 Publisher: China Building Industry Press Pub. Date : 2009-06. fluid and thermal-based is based on the Ministry of Education. Ministry of Construction. of higher vocational education building industry shortage of skilled personnel to develop training and guidance program. the guiding ideology for the preparation. is a professional construction equipment. engineering a backbone basis of professional theory courses. The book is divided into five units 21 subjects. Unit 1 topic of fluid mechanics 5. focuses on the main physical properties of fluids. fluid statics and fluid dynamics-based foundation. fluid loss and partial loss along the way the calculation of measures to reduce flow resistance and simple pipeline hydraulic calculation. Unit 2 pumps and fans of the three topics. mainly about the pumps and fans of the basic structure. working principle. performance parameters. the correct selection of pumps and fans. other commonly used pumps and fans. Unit 3 Engineering Thermodynamics of the five issues. introduces the basic concepts of engineering thermodynamics. ideal gas equation of state. basic thermodynamic process ideal gas. thermodynamic first and second laws. water vapor. wet air. nozzle. diffuser. throttle and so on. Heat transfer unit 4 of the five topics. introduces the basic concepts of heat transfer. steady heat conduction. convection. radiation heat transfer. steady heat transfer calculation of the basic laws and fundamental analysis. and to strengthen and weaken the heat transfer problem; unit 5 test The three issues presented hydrostatic test. and the local head loss along the experimental determination of experimental parameters and air. Fluid and thermal base with the characteristics of higher vocational education. classFour Satisfaction guaranteed, or money back.
